

## Reset password for the Administrator Control Panel 1.0 for osCommerce 2.2

### 1. Overwrite existing files with files from the catalog/ folder:

```
catalog/admin/login.php  
catalog/admin/includes/languages/english/login.php
```

### 2. Modify the catalog/admin/includes/functions/general.php file.

Add to the end of the file:

```
// Reset password for the Administrator Control Panel 1.0 - start  
function tep_create_random_value($length, $type = 'mixed') {  
    if ( ($type != 'mixed') && ($type != 'chars') && ($type != 'digits')) return false;  
  
    $rand_value = '';  
    while (strlen($rand_value) < $length) {  
        if ($type == 'digits') {  
            $char = tep_rand(0,9);  
        } else {  
            $char = chr(tep_rand(0,255));  
        }  
        if ($type == 'mixed') {  
            if (eregi('^[a-z0-9]$', $char)) $rand_value .= $char;  
        } elseif ($type == 'chars') {  
            if (eregi('^[a-z]$', $char)) $rand_value .= $char;  
        } elseif ($type == 'digits') {  
            if (ereg('^[0-9]$', $char)) $rand_value .= $char;  
        }  
    }  
  
    return $rand_value;  
}  
// Reset password for the Administrator Control Panel 1.0 - end
```
