Discount Code module for osCommerce update 2.4

1. Disable the module under Administration -> Modules -> Order Total -> Discount Code.

2. Overwrite existing files with files from the catalog/ folder:

```
catalog/includes/modules/order_total/ot_discount.php
catalog/admin/discount_codes.php
```

3. Modify the catalog/includes/modules/order_total/ot_tax.php file.
Find:

```
    function process() {
      global $order, $currencies;

      reset($order->info['tax_groups']);
      while (list($key, $value) = each($order->info['tax_groups'])) {
        if ($value > 0) {
```

Replace with:

```
    function process() {
      global $order, $currencies, $tax_discount; // Discount Code 2.4

      reset($order->info['tax_groups']);
      while (list($key, $value) = each($order->info['tax_groups'])) {
        if (!empty($tax_discount[$key])) $value -= $tax_discount[$key]; // Discount Code 2.4
        if ($value > 0) {
```

4. Set the sort order for order total modules under Administration -> Modules -> Order Total.

Modules	Sort Order
Discount Code	2
Shipping	3
Sub-Total	1
Tax	4
Total	5

5. Enable the module under Administration -> Modules -> Order Total -> Discount Code.
